## WORK EXPERIENCE

---

### Mobile / Web Developer

#### Brandcoders

📅 May 2021 - Oct 2023 (2 yrs 6 mos)

- Led the architectural design and development of a React Native mobile app using TypeScript, harmonizing with an ongoing platform project comprising a Next.js web app and a proprietary Node backend.
- Followed code patterns and high-level decisions set by the Frontend Developer Lead, maintaining consistency and quality across web and mobile applications.
- Swiftly integrated custom services and adapted to coding conventions, showcasing quick learning and immediate contribution to project momentum.
- Led training sessions on mobile app implementation for the client's team, ensuring smooth transition and operational readiness.
- Engineered a custom React component integrating Apideck, replicating Google Drive's folder structure for native file navigation and management, enhancing user experience and application functionality.

### Full Stack Developer

#### Logistimatics

📅 Jun 2019 - Feb 2021 (1 yrs 9 mos)

- Engineered lambda functions and integrated Google Analytics, alongside creating a "rules" engine backend module for real-time action generation based on tracker events, using technologies like GraphQL and SQL.
- Automated SIM card activation for AT&T, TWILIO, and Verizon, and streamlined app release process with CircleCI, reducing manual workload and accelerating deployment.
- Designed, implemented, and documented private/public APIs, and managed SQL database design for finance books, promoting system interoperability and organized data access.

## EDUCATION

---

B.S.

Computer Science

#### Florida International University

📅 September 2017 - June 2019

📍 Miami, FL

## SKILLS

---

- React Native
- IOS / Android
- Gradle
- Ruby
- Typescript
- JavaScript
- HTML
- CSS
- Next.js
- React.js
- Remix.js
- Node.js
- Express.js
- Rest APIs
- Golang
- SQL / No-SQL
- Scrum/Agile
